

PERFORMANCE IN THE FIELD

CASE STUD

October 2021 Long Island, NY

OVERVIEW

This case study highlights a simple remediation job in an unfinished basement. Relying on two of our solutions, two technicians with common remediation equipment and minimal PPE completed the job in under a day.

This unfinished basement was first treated with RE-Hydro to remove surface mold and organic staining. Finally, the space was fogged with DE-Mold to eradicate mold and sanitize the indoor air.

All of this work was performed without disruption to the family while they went about their day to day in the living areas of the home.

SOLUTIONS USED

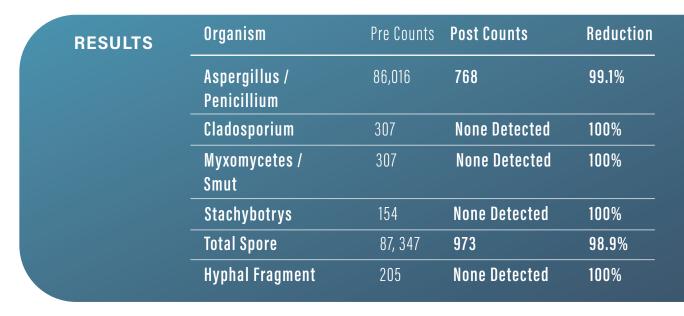

DE-MOLD Plant-based biological fog

RE-HYDRO Hydrogen Peroxide heavy duty surface cleaner

2 Solutions used for remediation
